

Assembly instructions for the Colonial 110 cm round dining table

- Unbox the Colonial table top and ensure that the transit bands holding the glass to the woven table top are not removed.
- Place the table top face down on a protected surface taking care not to damage the glass. Take care, as the weight of the top including glass is 24 kgs. If possible keep the glass side protectors in place. It is recommended that at least 2 adults be used to lift this section of the table.
- Unbox the table base and remove all packaging. Carefully align the base to the underside of the top. Please be careful of the glass table top.
- Locate the holes on the base frame to the holes on the table top.
- Place supplied bolts into all holes and finger tighten.
- When all in place, tighten with the provided Alan key. Please take care not to over tighten and damage the bolt head.
- When all bolts are secure, carefully lift the table and place into an upright position taking care, as the addition of the glass top will add weight.
- When the table has been moved to its designated position, carefully remove the transit straps holding the glass in position.
- We recommend that at least 2 adults be utilised to lift the glass and complete table.
