- Alcohol may be used in the initial processing of some flavourings.

**Product Name & Description:** Butter Shortbread Biscuit: The biscuits are round shaped with a light colour bake, a cookie aroma and a crunchy texture.

**Process Description:** The ingredients are sourced from approved suppliers and stored under appropriate storage conditions before entering the mixing process. The dough is formed through a depositor, before baking at approx 180°C. The biscuits are cooled and wrapped (flow wrapped) before being passed through a metal detector, weighed and coded. The biscuits are then packed into tins, sleeves etc before being placed into outer boxes, coded, stored and despatched.

**Hygiene & Process Controls:** The company operates a good manufacturing practice system that ensures its products are consistently manufactured to a satisfactory standard. A HACCP study of the process has been conducted and implemented. Appropriate controls have been applied where there is a process step that affects food safety, quality and/or legality. All our products are supplied free of rancid taste and odour.

**Batch Code Interpretation: PD00000**

All products are given a PD (production day) number for traceability purposes and ingredients control. First 3 numbers are the day of year of manufacture; last 2 numbers are the year of manufacture.

**Shelf life:** 14 months from date of production for flowrap products. Tie wrap packaging 10 months from date of production. Alternative packaging may reduce the shelf life and is available upon request.
