

HILTON III

THE MODERN CLASSIC WITH RELIABLE FUNCTIONALITY

HILTON III

MASSAGE CHAIR

The next generation of relaxation – Hilton III from Casada

The Hilton III carries on the tradition of elegance of the Casada massage chair family – a sophisticated classic! With its individual material mix of PU leather and high-quality textiles, it embellishes and revives any living area. Due to its solid build and spacious, soft seat cushioning, the Hilton III offers enough space for all body sizes and conveys a feeling of safety and excellent comfort. The neatly ar-

ranged, user-friendly remote control displays tried-and-tested massage techniques and automatic programmes and reflects its overall ease of use. Hilton III invites you to experience your personal haven of rest. The new braintronics® App makes holistic relaxation easier and more accessible than ever. Dream away, take a break from the life's daily hassles and allow body and mind to relax.

TECHNICAL DATA

Dimensions upright	80 x 116 x 140 cm
Dimensions reclining	80 x 88 x 173 cm
Weight	86 kg
Voltage	220-240 V ~ 50/60 Hz
Nominal power	max. 230 W
Rated runtime	15 minutes
braintronics	21 minutes
Certificates	CE PCF IEC

AVAILABLE COLOURS

Width of seating area 53 cm | Width of shoulder area (inside) 60 cm

Casada International GmbH
Obermeiers Feld 3
33104 Paderborn | Germany

SPECIALS

BRAINTRONICS®

Braintronics® technology synchronises your brainwaves through audio stimulation. Combined with a specially developed massage programme your stress-ridden body will be able to relax.

SHIATSU

Shiatsu (finger press) is a form of body therapy originating in Japan. The massage technique consists of soft, rhythmic, far-reaching stretches and rotations. The aim of Shiatsu is to simulate individual parts of the body and to mobilise the muscles.

2D MASSAGE

The intelligent 2D massage mechanism allows the massage chair to measure your back to determine a more exact position of the sections of the spine.

KNEADING

Skin and muscles are either clasped and kneaded between the thumb and the index finger or with both hands. This massage technique is used in particular to ease tension.

YOGA

Targeted stretch massages activate the body and have an invigorating effect on the whole of the body.

TAPPING

Short, tapping movements are performed with the edge of the hand, the palm or the fist. This promotes blood circulation in the skin and softens tense muscles. If tapping is performed at lung height, this can improve the release of mucus in the lung.

KNEAD & TAP (DUAL ACTION)

The techniques of kneading and tapping are combined in order to relieve tension and stimulate blood circulation at the same time.

ROLLING

Pleasant alternation between relaxation and releasing the muscles – also perfectly suited for a final massage, for relaxation and recovery of the muscles.

CARBON HEATING

Deeply penetrating Carbon infrared heat, blood vessels expand, the blood flow increases and the muscle tone is reduced. In addition, it carries out a highly beneficial effect on nerve cells, which are responsible for reporting pain to the brain.

SOLE ROLLER

Deluxe foot massage – even the speed of the foot rollers can be adjusted.

AIR COMPRESSION

Rising and receding airbags have a pumping motion which produces natural muscle reflexes. This is particularly beneficial in the calf and foot area.

L-SHAPE

You can expect a profound full body massage from the neck down to the buttocks.

S-LINE

With this automatic programme the massage heads are working very close to your body, they massage the whole back down to your buttocks. The S-shaped mechanic is constructed after the natural anatomy of the spine.

ZERO SPACE

For the lying-position the massage chair moves forward and therefore requires very little distance to the wall behind. Space saving and comfortable!

ZERO GRAVITY

You put yourself in the position of an astronaut – that “weightless feeling”.

AUTOMATIC

8 specifically developed automatic programmes for the whole body, which offer a big range of different massage techniques. Additionally you can also turn on the heating function, if you'd like.

BACK AREA

An individual applicable to any size massage area.

ADJUSTABLE FOOTREST

The footrest can be extended, this way it is adaptable to different body sizes.

RECLINING POSITION

The adjustability of the backrest and footrest contributes to personal well-being of the body position.

AIR AREA

Three air pressure modes (full body, arm and leg / lower body).

SPOT

The massage heads can massage a particular spot.

SPEED

Massage speed is adjustable.

WIDTH

The distance between the both massage heads can be set (narrow, medium and wide).

ACUPRESSURE POINTS

Key acupressure points are massaged.

MUSIC

Further relaxation and fun with the music function.

BLUETOOTH

Wireless data transmission.

ADJUSTABLE PILLOW

If necessary, the double cushion can be placed to reduce the neck and shoulder massage intensity.

AIR INTENSITY

Adjustable airbag massage intensity.

HUMAN HANDS FEELING

Specially designed massage heads imitate the hand motion of a professional masseur. The maximum stretch space is 6,5 cm, and the maximum stretch angle is 41 degrees, so the mechanical hands can do effective massage to human cervical vertebra thoracic vertebra and lumbar vertebra.

REFLEXOLOGY

Reflexology regenerates foot muscles and has a harmonizing effect on almost all organs inside your body.

braintronics®

brainwave stimulation system

The human brain is a complex organ consisting of millions of little nerve cells, called neurons. Each cell constantly produces tiny electrical impulses. Every thought, every sound and every impression, everything is transmitted and communicated by those small electrical impulses. Electricity is, so to say, the language of the brain. The sum of those impulses can be detected and diagrammed, e.g. by using an EEG. Charted on a graph this electrical activity forms a wave-like pattern, known as brainwaves.

With braintronics®, combining audio stimulation and guided meditations with a soothing massage, these brainwaves can be stimulated in order to reach different states of relaxation in the brain. Whether you want to sustainably enhance your concentration, or just relax and pamper yourself – everything is possible with a massage chair from the Casada family.
