*Sizes shown in millimetres

Minimum Space for air flow & Maintenance

For any applications where a wall higher than 1200mm is located in front of the unit a distance of a minimum of 1000mm is required.

Units can either be mounted at ground level on rubber anti vibration blocks or at height on wall brackets to a maximum of 3 meters.

*some of the larger systems may have to be sited at a lower level.

**Additional space of 300mm required to the left hand side of the unit to access the valves.
