

## RXJ - Outdoor Unit Dimensional Details

	RXJ25A	RXJ35A	RXJ50A9
Height (A)	552	552	734
Width (B)	840	840	954
Depth (C)	350	350	408

\*Sizes shown in millimetres

### Minimum Space for air flow & Maintenance

For any applications where a wall higher than 1200mm is located in front of the unit a distance of a minimum of 1000mm is required.

Units can either be mounted at ground level on rubber anti vibration blocks or at height on wall brackets to a maximum of 3 meters.

\*some of the larger systems may have to be sited at a lower level.

\*\*Additional space of 300mm required to the left hand side of the unit to access the valves.
