

EXTRA-LARGE Absorbent Pads

- ✓ Locks in wetness with quilted top layer
- ✓ Round-the-clock odor control
- ✓ Poly backing protects against leaks
- ✓ Quick absorption reduces splash and tracking
- ✓ Use for training, bedding, messy jobs

MADE IN THE USA

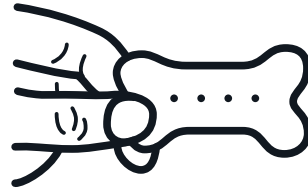

Directions for puppy training:

Unfold the pad and place it on the floor in the desired area, away from your puppy's bedding and food, with the quilted tissue side up and the blue poly backing side down.

Tips

- Your puppy needs to have access to the pad throughout the day.
- Place your puppy on the pad so it knows where it is.
- Keep the pad in the same location continuously so that your puppy will know where to go.

When your puppy goes on the pad, reward good behavior with praise and a treat.

Discard soiled pad and replace with a fresh one.

Tips

- Should your puppy have an accident, return it to the pad immediately and encourage it to use the pad.
- Once your indoor training is completed, if you would like to train your puppy to relieve itself outdoors, gradually move the pad closer to the door and finally outdoors to complete the training process.

Directions for human incontinence:

1. Unfold the pad and place it on the bed or chair with the quilted tissue side up and the blue poly backing side down.
2. Discard soiled pad and replace with a fresh one.

Directions for messy jobs:

This pad is great for everyday cleanup. The quilted pattern allows pads to quickly soak up all liquids. The impenetrable blue poly backing protects your hands and floor.
